1.0 INTRODUCTION

CEO Message

Thank you for your continued confidence in Delta Intelligent Technology. On behalf of the entire company, I can tell you that we are motivated and inspired by the opportunities that you give us to help you succeed. Delivering results that exceed your expectations is our top priority.

Over the years, we have built our major channels (Delta Intelligent Technology, Delta Security System, Delta Event Management System) and we have remained dedicated to developing our people, strengthening our capabilities, and building trusting relationships with our clients and partners. We also pride ourselves on providing superior talent to deliver high-quality solutions aligned with the key objectives of our clients—disciplined financial management, continuous performance improvement, and integrated technology enablement. We do so with flexibility and nimbleness that fit your objectives—not ours. We are excited for the future and the opportunity to work with you in these areas to exceed your expectations.

I also thank you for your participation in our annual customer satisfaction survey conducted by an independent third party. You rated us well above the industry standard for attributes that we feel define who we are and why we are different: positive attitude and willingness to get the job done, collaboration, flexibility, clear communication, and on-time delivery. You have my commitment that we will work hard to excel in these areas and others for years to come.

Sincerely,

Hussam Baghdadi,
CEO

About Us

DIT is a multinational organization that has a strong presence and association with multi-level manufacturers and accredited technology business partners in the GCC, Americas, and Asia. DIT has been established in 2002 by a team of experienced business, Telecommunication, Multimedia Solution professionals, DIT is both a developer and provider of complete hardware and software solutions for businesses of varying size and industry. DIT consists of a pool of experts and specialists with over 30 years of professional experience who aim to carry out integrated systems by applying the latest technologies, engineering techniques, and foolproof project management that meet the highest international standards.

Since its establishment, DIT has completed successfully many projects in Multimedia and Low current Solutions. The vision and industry knowledge of DIT management team has allowed the company to experience strong, steady growth, capturing market share in both large and small business markets.

Core Values

Our well trained employees are always available to ensure the best solutions and services. Our manpower resources are fully capable of providing in-house engineering for Total Security Solutions by integrating the above systems in projects related to Government Institutions, Military Bases, Airports, Industrial Sectors, Power Plants, Hospitals, Hotels, Embassies, Banks, and High Rise Buildings, Commercial, and Residential sectors in the Kingdom and in other GCC countries.

Line of Activities

Our line of activities includes studies, design, material supply, execution testing & commissioning for the products of **Multimedia solution, Digital Signage, LED (indoor/outdoor), Queue Management System , Holo Display screen , CCTV, Access Control, Automation and Smart technologies** with a wide range of products & services to meet the ever changing requirements of the modern world.

Our Vision

To be a benchmark company provider of premiere integrated technology solutions in the whole of Middle East associated with our Strategic partner in Americas and in Asia.

Our Mission

Providing and delivering top quality, high performance integrated technology solutions that exceed our clients' expectations; and a mutually beneficial working atmosphere for our employees, shareholders, partners, and suppliers by upholding trust, respect, and professional work ethics as core values.

2.0 TECHNOLOGY FOCUS

Audio Visual Solution:

DIT specializes in designing, installing and maintaining integrated audio, video and control facilities for a wide variety of environments including command and control centers and video teleconferencing facilities, classrooms, conference and training rooms, auditoriums and more.

1. Display Screens
2. Projection Screen
3. Projectors
4. Stage Lighting
5. Furniture & Podiums
6. Conference System
7. Interpretation
8. Nurse Call Systems
9. IPTV, MATV
10. Control & Automation Systems

MULTIMEDIA SOLUTIONS (DIGITAL SIGNAGE SYSTEM)

1. Interactive White Boards
2. Interactive Touch Screen
3. 32 Multi Touch Screen
4. Interactive Floor
5. Audio and Video Conferencing
6. Digital Signage System

LOW CURRENT SOLUTIONS

1. Access Control
2. CCTV
3. Time Attendance System
4. Public Address
5. SMA TV
6. Gate Barrier

QUEUE MANAGEMENT SYSTEM

DIT provides an efficient channel towards customers at the right place and at the right time. It has the capability to inform and entertain the public audience or even carry out business transactions, gather marketing information etc... Each service gives adequate solution and can reduce operational costs which are the keys for successful business.

Having a flexible designer group and manufacturing capacity, we are able to fulfil extreme requirements concerning any special shape, coloration or hardware elements. In this way the special design can represent and reflect the image of the company or its business philosophy.

Main Features:

Software customization

- Security-enabled
- Browser-based
- Third-party integration capability
- Statistics reports such as :
 - Total users served in a month, week, day, or hour.
 - Total and average wait times for each patient/user
 - Total number and percentage of potential customers who had been served within the waiting time target.
 - Number of open counters and rooms
 - Number of customer waiting to be served by their queue number at the time the number was issued.
 - General average waiting times and service times

INFORMATION & COMMUNICATION TECHNOLOGY

We have the qualified engineers to perform design, supply, installation & commissioning for any ICT project.

DIT has long track record in software solution design, implementation and development as well as network design implementation and support. Our team of professionals works diligently to meet client's needs to optimize costs and maximize results using custom processes, automated tools, and best in class expertise to accompany your solution's life cycle from Application design & development, through Implementations And integrations

DIT delivers enterprise – level solutions and end user support. DIT is best recognized for:

- Business and technology expertise and resources
- Custom web/Client Server and Wireless Applications.
- IT security should be an ongoing process our long experience in this field energizes us with the ability of dealing with most of the multimedia manufacturer's.

STRUCTURE CABLING SOLUTION

- Consultation.
- Design of both UTP and Fiber optic passive systems.
- Project Management.
- Implementation. Documentation, as built drawing and test results.
- Commissioning

INFRASTRUCTURE DESIGN

- Includes all cabling related to data, voice and video services.
- Inside plant design both Fiber and copper (Residential, Commercial and Retail shops , Shopping malls, hospitals , universities)
- Outside Plant design both Fiber and Copper(Residential, Commercial).

TELECOMMUNICATIONS

DIT delivers Intelligent Communications solutions that help companies transform their businesses to achieve marketplace advantage.

- IP Telephony.
- Contact Centers.
- Consultation.
- Design of TDM telephony systems, IP telephony, Call center.
- Project Management.
- Implementation.
- Training. Commissioning.

NETWORKING & WIRELESS

Our network specialists have industry accreditations, in addition to

- extensive practical experience in the professional delivery of effective network solutions.
- Consultation
- Design of small to large local area network
- Access Management Implementation
- Training
- Commissioning
- Bandwidth Management
- Network Security (including Firewall Configuration and Management)
- Video Conferencing

3.0 SOLUTION PARTNERS

4.0 MANAGEMENT & ORGANIZATION

DIT is managed by professional engineers having wide background of engineering practice and capable of combining their depths in experience with the latest engineering “know how”:

Estimation & Design Division:

This division performs project planning, design and supervision activities. The designs are produced in accordance to the known international standards and suitable factors are always applied in order to satisfy requirements of the local ambient conditions. Quality of materials and equipment is assured by high standard specifications.

Operations Division:

This division performs tendering, procurement, execution and maintenance of works. It employs highly skill engineers and electricians with the aim of executing the works in a good workmanship manner and in accordance to the international codes of practice in order to ensure ratability and safety in operation.

Content Management System Division

This division serves as the concept and design generator for DIT's other divisions. By implementing the latest techniques in engineering, architectural, and graphics design, DIT ensures clients with only the highest levels of innovation and practical applications for all of its products and solutions.

Industrial Tools division

Our capabilities are proven as a strong supplier to major clients and large scale projects that provide our clients with the best of breed products that make their businesses ready today for tomorrow's needs and requirements.

Our products and technologies are tried and tested in real-world business environments.

Our biggest asset are our sales force that possess' broad experience in sales and also provide technical support to our clients as well as after sale service and follow up.
